

# **WE HAVE THE INFO SPOTS, WE NEED THE AIR TIME.**

*Direct Order*, a 57 minute documentary film by Scott Miller and narrated by Michael Douglas, includes ten 30 or 60 second TV spots that can be used to inform the public.

**THE ONLY WAY TO WIN THIS BATTLE** is if military personnel, inspired and supported by these civilian infomercials, stand up against this atrocity together and refuse this vaccine... *en masse*.

**THE ONLY WAY TO WIN THIS BATTLE** is that along with the infomercials, this 57 minute film must be played in every town in America that has a military base.

**THE ONLY WAY TO WIN THIS BATTLE** is to have some individual(s) come forth immediately with the funds to put these spots on the air all over America. (If done locally, TV commercial spots can cost only \$60.00 each in many regions.)

We need your help to distribute these valuable infomercial TV spots — and your generosity.

To donate call the Scott Miller Company at 310 457-7138

*Direct Order*, a film by Scott Miller, is a must see for every soldier and every civilian concerned with being forced, like cattle, to take vaccines with out informed consent.

This film documents the covert military initiative, in which over 600 thousand men and women in the US military, were forced by direct order to take the Anthrax vaccine not only without their knowledge, but without being recorded as having done so on their Military medical records.

It becomes obvious to one seeing this film, that the Biopharmaceutical Industry is using our military as subjects in a vast experiment on biowarfare.

In 1999 Tech. Seargent Jeff Moore was given a direct order to submit to "classified" Anthrax vaccinations. Soon after he began having severe problems including arthritis, short-term memory loss and dizzy spells, some of which plague him to this day.

"I don't think you can express with enough emotion or sincerity how this can drastically alter your life."

— from *Direct Order*, a film by Scott Miller.

**YOU ARE NEXT:** The latest government law, "The Bioshield Act" gives the Department of Defense the power to administer untested, unapproved drugs and vaccines to both military personnel and civilians in times of "potential emergency" whether real or not, without informed consent.

U.S. District Court Judge Emmet Sullivan issued an interim order to halt the administration of the Anthrax vaccine until the FDA finalized its approval. However, once fast tracked, the issue still remains that it is now a matter of law that the government can force vaccines on both the military and the American men, women and children without consent or choice in case of a "potential" emergency.

It is the considered opinion of those in politics that Congress will not repeal this Act nor define "potential" emergency.
